1. Introduction of Integrated Library Management System (KOHA)

College library using KOHA Integrated Library Management System since 2022. This open-source software operates on a cloud server, providing a dynamic and efficient solution for library automation.

Koha encompasses modules for acquisitions, circulation and patron management, cataloguing, serials management, authorities, flexible reporting, label printing, multi-format notices, administration, Web-OPAC, offline circulation (for instances when Internet access is unavailable), and much more. It caters to libraries of all sizes, including consortia, multi-branch, multilingual and translatable, adheres to library standards, offers web-based interfaces, operates on open-source principles, and is suitable for both single-branch and multi-branch libraries.

2. Procedure for Operating Integrated Library Management System (KOHA) on Cloud Server.

The College Library has streamlined its operations through the utilization of KOHA's cloud-based Integrated Library Management System.

The following are the key functionalities of KOHA:

- ➤ WEB OPAC: Patrons can access comprehensive information about the library's collection, facilities, and services through the library's website. Two OPAC terminals, located on the ground floor, and one on the first floor, facilitate online searches for library publications.
- ➤ Remote Accessibility: Library resources, services, and facilities are accessible remotely, allowing patrons to conveniently check the availability, accessibility, and location of resources by various criteria, including Title, Author, Subject, Publisher, and Keywords.
- ▶ Patron Account Access: Patrons can access their library membership accounts using a Login ID and Password. The Login ID is the Member ID Number, and the initial Password is provided on the college ID card. Patrons can change their password for added security. Within their accounts, patrons can review book transaction records, fine charges, personal details, checkout history, and more, all from a remote location.
- ➤ **OPAC Facility:** The library offers Online Public Access Catalog (OPAC) facilities, with two terminals available on the ground floor and one on the first floor. This enables patrons to search for books and other publications online using criteria such as author, subject, title, barcode, and keywords.
- Access to E-Resources: Through Web-OPAC, patrons can access the library's collection of open-source and subscribed e-resources, including N-LIST (National Library and Information Services Infrastructure for Scholarly Content). Patrons can visit the N-LIST portal through the library's webpage\Web-OPAC or directly through https://nlist.inflibnet.ac.in/index.php, using their registered email ID and a password provided by the college library.

DSpace is an open source repository application that allows to capture, store, index, preserve and distribute digital material including text, video, audio and data. DSpace provides a way to manage materials and publications in a professionally maintained repository to give them greater visibility and accessibility over time. There are over 1000 digital repositories worldwide using the DSpace application for a variety of digital archiving needs. DSpace is most often used as an institutional repository - a platform that provides access to research output, scholarly publications, library collections, and more.

DSpace can be used to store any type of digital materials, including:

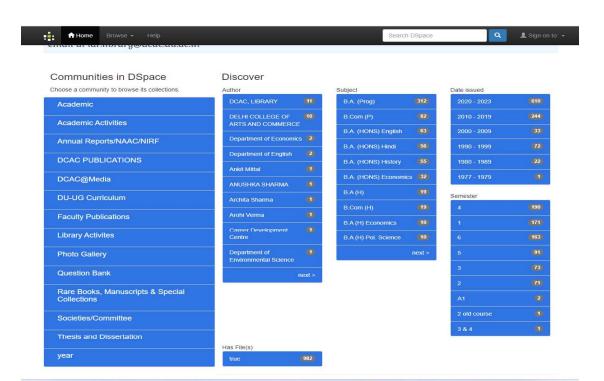

- Documents, such as articles, preprints, working papers, technical reports, conference papers
- Books
- Theses
- Data sets
- Computer programs
- · Visualizations, simulations, and other models
- Multimedia publications
- Administrative records
- Published books
- Overlay journals
- Bibliographic datasets
- Images
- Audio files
- Video files
- e-formatted digital library collections
- Learning objects
- Web pages

<u>College Library introduced and implemented Radio-Frequency Identification (RFID)</u> <u>technology</u>

RFID: Radio Frequency Identification technology uses radio waves to identify people or objects. College library incorporated RFID technology for efficient library management and this includes RFID-enabled smart cards, a self-circulation kiosk for quick and easy book borrowing, a book drop station for returns, and timely email notifications for over dues books. Patrons can check each book transaction simultaneously.

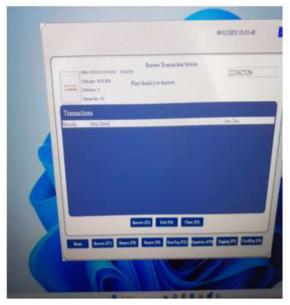

University of Dalhi

-University of Delhi-

Snap Shot of RFID Smart card Printer for generating RFID enabled Smart Card for Patrons

Procedure for Operating Radio-Frequency Identification (RFID)

Using RFID technology in libraries saves time of library staff's by automatizing their tasks. Uses RFID library management saves the times a book reader.

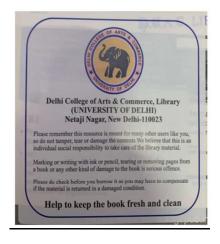

-University of Delhi-

Taking care of books and making them available to the book readers are important tasks. Majority of the library staff spent the time in keeping the record of incoming and outgoing of books.

The following are the key functionalities of RFID:

RFID Tags: Incorporating RFID tags within book covers, libraries can streamline book transactions. Each book's bibliographic data is entered into the library software. When a user brings a book for issue or return, the RFID reader reads the tag, allowing for quick processing. Upon exit, the RFID tag is checked to ensure proper issuance, and any irregularities trigger an instant alert. This system improves efficiency and effectively reduces document theft in libraries.

<u>Self-Check-In touchscreen enabled user-friendly Kiosk is primarily for issue/return and renew of books in Library</u>

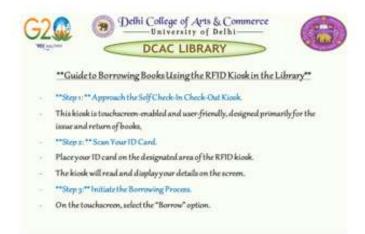

-University of Delhi-

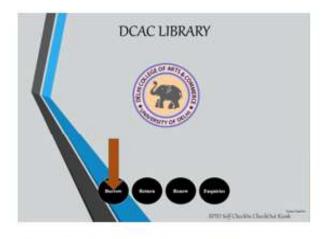

Shelf check- In/Self-Check-Out kiosk offer numerous benefits, including enhanced efficiency and convenience. It allowspatrons to complete various common tasks on their own without the assistance of a dedicated employee such as self-issue/return and renew ofbooks in library with its inbuilt screen and patrons can view & print transactionrelated information such as number of books issued, outstanding, fine etc.

Guide to Borrowing Books Using the RFID Kiosk in the Library

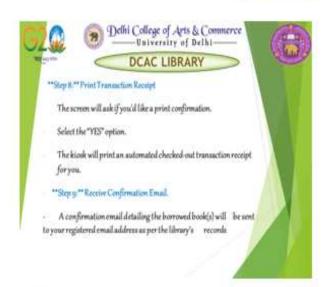

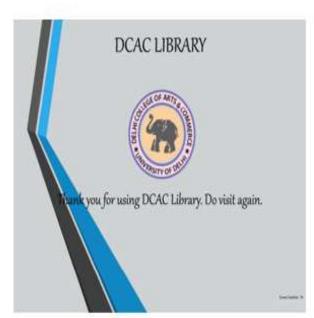

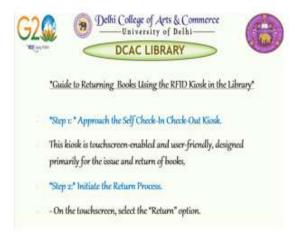

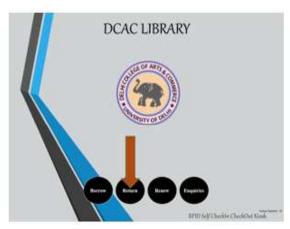

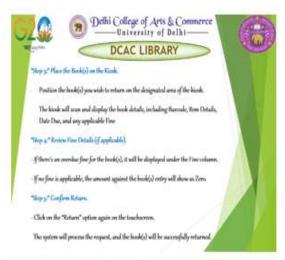

-University of Delhi-

Guide to returning books using the RFID Kiosk in the library

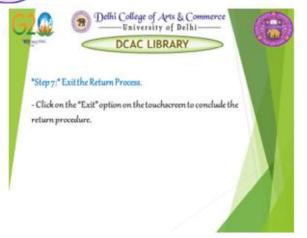

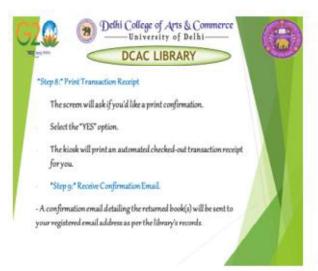

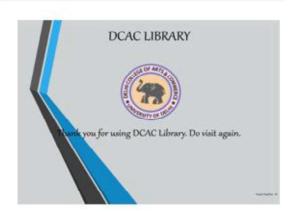

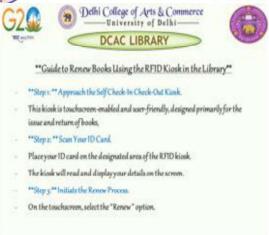

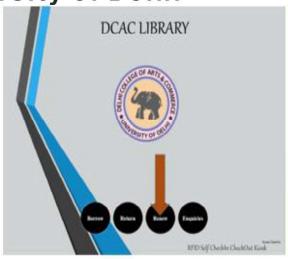

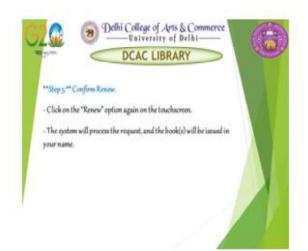

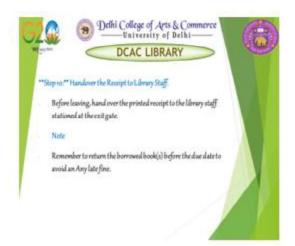

University of Delhi-

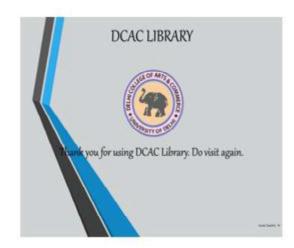

RFID Book Dropbox enabled user-friendly Kiosk is primarily for returnbooks in Library

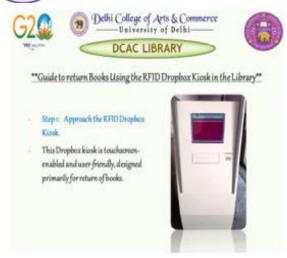

The drop box used for returning the books it helps better circulation and gives time flexibility to patrons for returning of library materials issued by patrons.

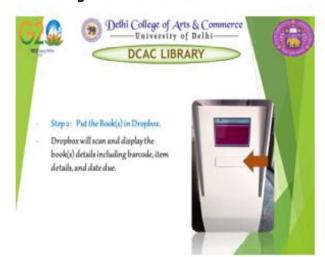

The RFID Book Drop-Box is a solution that revolutionizes book returns in libraries. With this RFID Book Drop-Box, patrons can return books at their own convenience, eliminating the constraints of library hours and limited return windows. This hassle-free process allows individuals to return items even when the library is closed, catering to busy schedules.

Guide to return Books Using the RFID Dropbox Kiosk in the Library

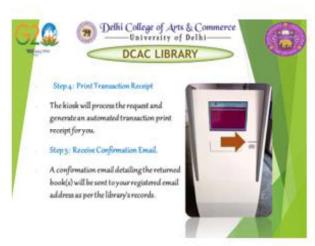

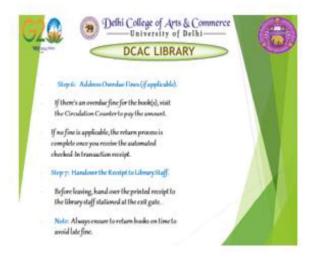

University of Delhi-

-University of Delhi-

RFID-enabled security gate

RFID-enabled security gates are a great way to keep our library safe. It's easy for staff members to know who is returning an item and who is taking items out of the library without issuing. This security gate is installed at the entrance and exit point of the College library.

-University of Delhi-

RFIDHandheld Reader

RFID Handheld Reader devicedetects books or other media that haven't been checked out. Stock verification in library can be done with RFID handheld devices more efficiently with high accuracy. It also helps to analyze the preventive measures required to control loss of items.

-University of Delhi-

RFID Staff Station Reader

RFID Staff Station Reader is a staff assisted station on services such as loan, return, tagging, sorting and etc. The integrated reader features excellent tag read/write operation performance with a high identification rate. The staff puts the item on the reader and click on the view to display the information stored inside the tag.

1. Webinar on "Selective Dissemination of Information Services to Library Users using Print and Open Access Sources" - November 12th, 2021.

-University of Delhi-

On the 12th of November 2021, the College Library hosted a webinar titled "Selective Dissemination of Information Services to Library Users using Print and Open Access Sources" through the Google Meet platform. This webinar aimed to enhance the knowledge and skills of library professionals and users regarding the effective utilization of print and open access resources for disseminating information.

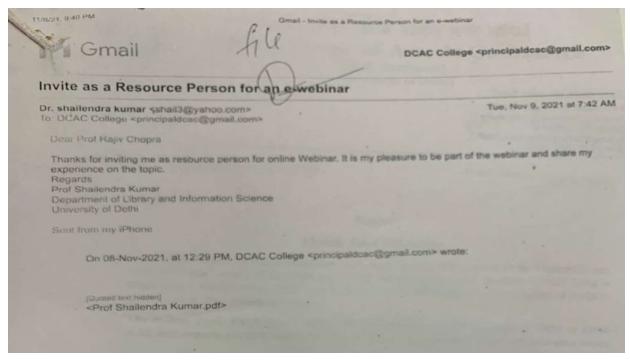

1. Transition to Koha Software

In pursuit of upgrading library services and facilities, as well as making library resources accessible online and remotely, the College Library transitioned from its previous software (NETTLIB) to the Koha Integrated Library Management System.

2. Introduction of Integrated Library Management System (KOHA)

The College Library has embraced the modern era of library management through the implementation of the Integrated Library Management System known as KOHA. This open-source software operates on a cloud server, providing a dynamic and efficient solution for library automation.

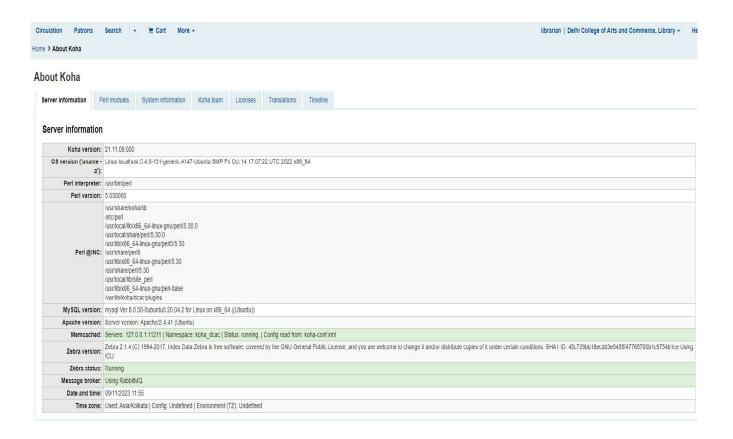

Koha, derived from the Māori word "gift," represents the world's pioneering open-source library automation system. Developed by the Horowhenua Library Trust in 1999, Koha was

released under the GNU General Public License. It has gained global recognition and is utilized across diverse library types, proving itself as a robust enterprise-class ILS with comprehensive functionalities.

cataloguing, serials management, authorities, flexible reporting, label printing, multi-format notices, administration, Web-OPAC, offline circulation (for instances when Internet access is unavailable), and much more. It caters to libraries of all sizes, including consortia, multi-branch, multilingual and translatable, adheres to library standards, offers web-based interfaces, operates on open-source principles, and is suitable for both single-branch and multi-branch libraries.

3. Procedure for Operating Integrated Library Management System (KOHA) on Cloud Server.

The College Library has streamlined its operations through the utilization of KOHA's cloud-based Integrated Library Management System.

The following are the key functionalities of KOHA:

- ➤ WEB OPAC: Patrons can access comprehensive information about the library's collection, facilities, and services through the library's website. Two OPAC terminals, located on the ground floor, and one on the first floor, facilitate online searches for library publications.
- ➤ Remote Accessibility: Library resources, services, and facilities are accessible remotely, allowing patrons to conveniently check the availability, accessibility, and location of resources by various criteria, including Title, Author, Subject, Publisher, and Keywords.

Snap Shot of WEB OPAC: Online public access catalogue (OPAC)

-University of Delhi-

Patron Account Access: Patrons can access their library membership accounts using a Login ID and Password. The Login ID is the Member ID Number, and the initial Password is provided on the college ID card. Patrons can change their password for added security. Within their accounts, patrons can review book transaction records, fine charges, personal details, checkout history, and more, all from a remote location.

Snap Shot of remote login:

Snap Shot of after login to account in order to check books transaction record, fine charges, Personal details, checkout history etc.

-University of Delhi-

➤ OPAC Facility: The library offers Online Public Access Catalog (OPAC) facilities, with two terminals available on the ground floor and one on the first floor. This enables patrons to search for books and other publications online using criteria such as author, subject, title, barcode, and keywords.

OPAC FACILITY

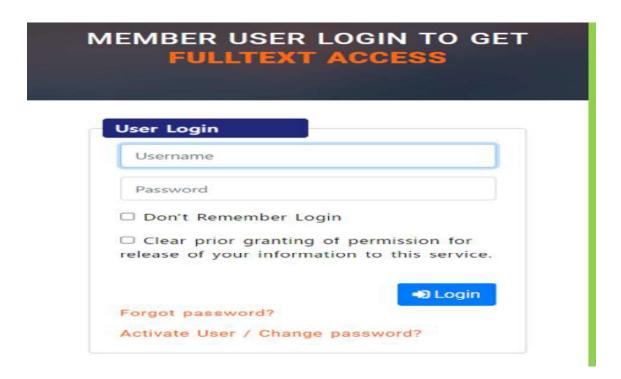

Access to E-Resources: Through Web-OPAC, patrons can access the library's collection of open-source and subscribed e-resources, including N-LIST (National Library and Information Services Infrastructure for Scholarly Content). Patrons can visit the N-LIST portal through the library's webpage\Web-OPAC or directly through https://nlist.inflibnet.ac.in/index.php, using their registered email ID and a password provided by the college library.

Snap Shot of Web-OPAC

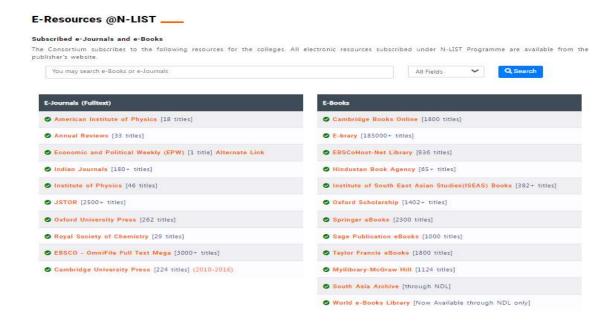

-University of Delhi-

4. Annual Library Orientation Programme:

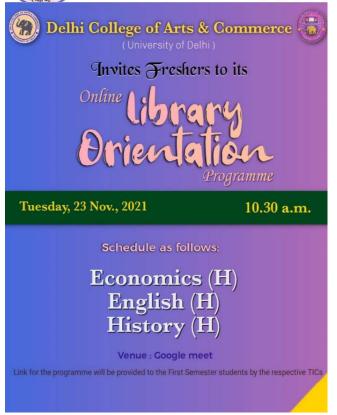

The College Library annually conducts a Library Orientation Programme aimed at familiarizing new students with the library's resources, services, facilities, rules and regulations, and layout. This initiative is designed to empower students with the knowledge they need to make the most of the library's offerings.

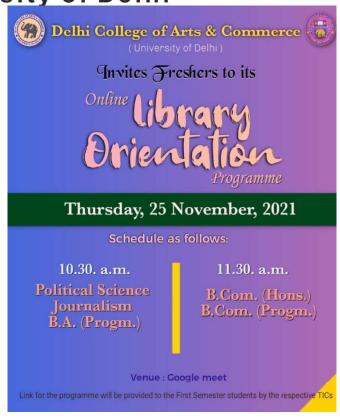

In 2021, the Library Orientation Programme was conducted through Google Meet on the 23rd and 25th of November. This virtual approach ensured that all incoming students were introduced to the library's valuable resources and services, even in the face of logistical challenges.

5. Staff Training in ICT, software and Information Technology

To enhance the competencies of library staff in the realm of ICT and information technology, the College Library regularly conducts training sessions. These sessions serve to familiarize staff with newly implemented software and technologies, ensuring they are well-equipped to provide efficient library services.

6. Training on Library Integrated Management System (KOHA) - May 23, 2022, to May 25, 2022

From May 23rd to May 25th, 2022, the College Library organized a comprehensive training program on the Library Integrated Management System, KOHA. This training aimed to equip library staff with the knowledge and skills necessary to maximize the potential of this open-source software.
